

HTTP Body

An HTTP body is as the name implies the body of an [HTTP](#) request or response message, containing the bulk of the content of the message.

The body may consist of: * Request line containing the [HTTP](#) and target (GET /logo.gif HTTP/1.1
* Response status line, such as (HTTP/1.1 200 OK`) * Additional [HTTP Headers](#) * An empty line *
Optional data in different types (plain text, JSON, XML, form data, or multipart files and so on)
